The voice of the Moon

Prime Moon delight for the ear and eye!

Prime Moon is a new Finnish innovation where modern design, unique hand picked soapstone and skillfull engineering are combined as a high quality loudspeaker. Prime Moon in every detail has been carefully considered to produce the best possible sound. The basis for the exelent sound is a special integrated structure carved from stone. The shape of the interior is designed to effectively prevent any disturbing resonances and gives the loudspeaker its optimal acoustic properties.

Prime Moon on uusi Suomalainen innovaatio jossa moderni muotoilu, ainutlaatuinen valikoitu vuolukivi ja insinööritaito yhdistyvät huippulaadukkaaksi kaiuttimeksi. Prime Moonissa jokainen yksityiskohta on tarkoin harkittu parhaan mahdollisen äänen tuottamiseksi.

Hyvän äänentoiston perustana on erikoinen, kiveen integroitu kotelorakenne. Sisäosan muoto ehkäisee tehokkaasti kaikki kuuntelua häiritsevät, kotelosta johtuvat resonoinnit ja se antaa kaiuttimelle optimaaliset akustiset ominaisuudet.

Modern

The characteristics of Prime Moon are flat frequency response, excellent resolution and remarkable bass response. Prime Moon is suitable for both two and multi channel configurations and fits well with modern flat-screen displays.

Prime Moon omaa tasaisen taajuusvasteen, erinomaisen erottelukyvyn ja muhkean bassotoiston. Prime Moon soveltuu niin kaksi- kuin monikanavajärjestelmiin ja on erinomainen valinta nykyaikaisen taulutelevision seuraan.

PERFORMANCE SPECIFICATIONS:

Prime Moon is a 2-way reflex enclosure loudspeaker.

Drivers: 120mm woofer/midrange and 27mm tweeter manufactured by Seas.

Crossover frequency: 4Khz

Nominal impedance: 8 Ω

Sensitivity: 82db (2.83v , 1m)

Frequency range: 68-20000hz

Recommended output power: 20-100w

Connectors: Supra Boxcon

Size: Width 200 mm, height 298 mm and depth 138 mm

Weight: 8,5 kg

Material: Designed soapstone, surface finished with special wax

SALES:

Available from well equipped special shops.
